

## 2020: Contemporary Vision for Nocturnal Environments

*New offer: urban lighting support and collaboration with WBE, sole proprietor,  
Leni Schwendinger consults with your staff to develop design documents.*

Upper-level illumination design services by Leni Schwendinger to ensure quality nighttime experiences for end users through guidance, collaboration and advisement for landscape architecture and urban design clients. Technical assistance is added as needed.

Design Development and CD phases options include hand off to:

- Internal design staff
- Team electrical engineer
- LSLP partner technical team

### **Key services**

- Existing conditions
- Community engagement if needed
- Develop concepts to match architectural design themes
- Basis of Design Report (Schematic)
- Review and Comment (Final Design)
- Commissioning

### **Nighttime Pre-design**

1. Site visit
2. Existing conditions report
3. NightSeeing Program: Community and stakeholder interaction
4. Recommendations - night and light principles

### **Design Stage 1 - Schematic**

1. Design workshop guidance
  - Including precedents, examples
  - Relevant case studies
2. Concept/Schematic Basis of Design consisting of:
  - Sketches
  - Rendered site plan
  - Rendered design for specifics - section/elevation as needed
  - Fixture Families

### **Design Stage 2 - Design Development through Construction Documentation**

1. Review, comment, answer questions throughout final design process (minimum retainer, then hourly)

### **Design Stage 3 - On-site commissioning**

2. Supervise aim and adjust
3. Supervise level setting and states (control system)
